My experience covers the areas of product development and sales to technical operations and support as well as database development and support .

My experience covers areas of:

- Product development and sales
- Hardware and Software support for many western states
- Project management of small to large projects
- Database development and support
- Management of 3 Olympic events for 2002 Winter Olympics
- Software development

Work History

- | | | |
|--|-----------------------------|------------------------|
| Applications Support
Engineer | Xango, LLC, Lehi, UT | 2/2007 – 3-2009 |
|--|-----------------------------|------------------------|

At Xango I aided in bringing Asia on board by establishing better communications between Asia and the home office.

- Originally hired on to bring Japan up to speed with Xango's newer software as well as providing support requiring me to speak Japanese.
- I was later involved in the installation of DataTrax which required an in-depth knowledge of the business.
- I was given sole responsibility of ADP (Automated Delivery Procedure) which is considered one of two of the most important applications at Xango. This included daily running of procedures to be sure that orders and payments were correct and up to date for our online systems. This was done 7 days a week.

Programmer Analyst

**Utah Loan Servicing Corp
Salt Lake City, UT**

4/1983 – 3/1984

- Maintained student loan processing for all Utah student loans.
- Converted antiquated system to relational database system

Ski School Videographer

**Deer Valley Ski Resort
Park City, UT**

10/2002 – 2/2007

- Setup, ran and maintained a state-of-the-art software for Deer Valley Ski School. This software, computer and video system is used as a teaching tool for private lessons and instructor training. This software was utilized by national television during the 2002 Winter Olympics and used in the Athens Olympics.
 - Continued with efficiency enhancements resulting in an increase over 300% usage of the state of the art video system.
 - Developed and maintained an MS Access database to track all information and activities pertaining to this system
 - Setup and provided training for the system which included documentation, policies and procedures for the entire system as well as training videos.
-
